

5-Day OpenShift End-to-End Training TOC

Day 1: Foundations + Architecture + Setup

- Evolution from VMs to Containers
- Kubernetes basics (Pods, Services, Deployments)
- OpenShift architecture & Operators
- CLI (oc), Web Console, Projects & RBAC

Day 2: Deployment + Build Lifecycle

- S2I, Git-based deployments
- BuildConfigs, ImageStreams
- Internal registry, build strategies
- Deployment strategies & rollbacks

Day 3: Config + Networking + Storage

- ConfigMaps & Secrets
- Services, Routes, TLS
- Blue-green, Canary
- PV, PVC, StorageClasses

Day 4: Security + Scaling + Observability

- SCC, RBAC, secure images
- HPA, resource limits
- Liveness/readiness probes
- Monitoring, logging, troubleshooting

Day 5: CI/CD + DevOps + Cloud + Capstone

- Tekton pipelines, Git integration
- GitOps (ArgoCD), Jenkins
- Cloud OpenShift basics
- Optimization, cost control
- Capstone project deployment
